

INDUSTRIAL APPLICATIONS

OFF-SHORE OIL RIG, REFINERIES, DRY DOCK:

The Hammerhead is ideal for on-shore and off-shore harsh weather conditions and salt water deposits will not hinder performance. With its adjustable pressure and temperature setting, the Hammerhead effectively removes grease and grime.

MINING, ON-SHORE DRILLING:

The Hammerhead with its stainless steel construction and "Pro-Tect-It" frame is designed to take the punishment of the oil field and mining environment and provides the cleaning power to perform even the toughest of cleaning tasks.

LOGGING:

The Hammerhead's durable construction and impeccable reliability makes it ideal for cleaning applications in forestry and logging operations. The stainless steel frame and panels resist corrosion in the damp environment.

THE HAMMERHEAD

Performance

Durability

The all diesel HAMMERHEAD is a mobile wash skid designed for maximum cleaning performance while operating in harsh weather environments.

The Hammerhead incorporates unique features requested by professionals and is the chosen piece of equipment by operators and maintenance personnel.

Built-in Lifting eyes:

Designed for a 4-point lifting sling, as recommended by OSHA, for greater flexibility when moving the system.

Y Strainer:

Water filter protects pump.

Extended Run Times:

Equipped with an 18 gallon diesel fuel tank for extended run times and minimum refueling. Burner and engine draw from same tank increasing efficiency and minimizing space.

For more information, contact:

“Pro-Tect-It” Frame:

This unique design offers total protection for your investment, eliminates direct impact and damage. The built-in lifting eyes gives you greater flexibility and protection when moving the system.

12 Volt Diesel Fired Burner with Auto Ignition:

Includes a 1/2" schedule 80 coil and stainless steel enclosure that offers exceptional heating ability and long life for years of service. The auto ignition feature improves burner efficiency and conserves fuel.

Emergency Shut-Off:

Easy access emergency valve. Shuts off air supply to engine, increasing operator safety.

Diesel Engine:

Heavy duty, water-cooled Kubota Diesel engine with electric start.

◆ **Pressure:**
3000 psi

◆ **Water Flow:**
5.5 gpm

Front Mounted Controls:

Easy access panel for simple adjustments by the operator. The standard hour meter monitors run time for scheduling routine maintenance and preventing downtime.

Stainless Steel Construction:

Frame and panels are constructed of 304 Stainless Steel for ultimate protection. Offers lifetime durability and resistance, withstanding harsh environments and tough working conditions. Allows your equipment to outlast and outperform the competition.

Pump Protection:

Nickel plated pump head protects the pump and vital internal components against harsh elements extending the life of the pump reducing maintenance cost.
